The greatest danger, however, because the

most common, is that it will extend downward and affect the lungs. In most cases of pulmonary disease catarrh is present in some degree, and in many instances it causes a large share of the patient's discomfort.

Besides these grave consequences, all of which are liable to spring from scrofulous catarrh or oxona, there are others which, if less dangerous, are sufficiently unpleasant. It occasions great unhappiness to thousands of both sexes, by isolating them and preventing their settlement in life. The workingmen in these places are busily engaged in the work of raising subscriptions for the purpose of sending workingmen to Parliament. There can hardly be a doubt that the reason why there are at present so few representatives of poor men in the British Parliament to-day lies in the fact that no man with a secured livelihood can afford to accept an unsalaried Parliamentary seat, and few labor constituencies can afford to pay salaries by subscription. If the members were to-day salaried, like American Congressmen, the House of Commons would soon be revolutionized in its character. EMMA NEVADA is out of luck. Sirs: My attention has been called to a paragraph in a letter published in the World newspaper of this city of Wednesday, April 29, of which the following is a part:

"The work upon his new book, about the loss works have been said in the part. of General Adam Badeau. General Grant, I have no doubt, has furnished all of the material and all of the ideas in the mem-

position. The most that General Grant has done upon this book has been to prepare the rough notes and memoranda for its various chapters."
I will divide this into four parts and

answer each of them:

1st. "The work upon his new book, about which so much has been said, is the work of General Adam Badeau." This is false. The composition is entirely my

own.

2d. "General Grant, I have no doubt,
has furnished all of the material and all
of the ideas in the memoirs, so far as they
have been prepared." This is true.

3d. "But Badeau has done the work of
composition." The composition is entirals my own. "The most that General Grant has

done upon this book has been to prepare the rough notes and memoranda for its various chapters." This is false. I have position and preparing notes, and no one out myself has ever used one of such notes

Among the press dispatches to the Times, a few days ago, was one from Washington describing the count of cash in the Treasury, upon the occa- they usually make a clean breast of it.' sion of turning over the bureau by it late Republican head, Mr. Wyman, to his Democratic successor, Mr. Jordan As a result of that count, it will be recollected, the startling, stunning, paralyzing fact was developed that iscrepancy of two cents had been discovered. This was not the awful that Mr. Hendricks he went and down the country, during the last Presidential campaign, making himself hoarse erying, "Examine the books!" and making capital against the Republican party by ussupported insinuations that the books had not been examined for twenty-four years, and therefore that there must be something crooked

made the Washington correspondent of the Cincinnati Commercial Gazette Spaulding contributes a very able article from his side of the question, rewrote of the result in the following effective manner:

Thus far all capital expected from view of the books of the Republican administration for twenty-five years has failed of realization. Two long months en spent in the endeavor to turn up something discreditable to the Re-publicans, and not a thing can be shown. Upon the contrary, every at-tempt results in increasing the general admiration of the bonesty and efficiency and industry with which the vast and complicated affairs of the government

The great count of the money in the Treasury, from which so much has been raguely expected by the Democrats, anded to-day, and by the report of the Democratic counters the sum of two cents was found missing. Three dollars and two cents were first reported missing, but the three dollars were afterwards discovered in a corner, where they had rolled when accidentally dropped by the counters. ropped by the counters. So the Re-publican thievery in the Treasury for publican thievery in the Treasury for twenty-five years amounts to two cents. And for this has gone up the long and doleful cry from old man Dana to "turn the rascals out," and from Mr. Davis and Mr. Hendricks and so on, the great yell for a look at the books. The most splendid victory ever won by the Republican party, the grandest showing ever made by them, is in the development to-day in

Never in its history has the Republican party shown up so grandly as it does under the investigation of the Democrats. Where now are all the Democratic campaign cries of many years of incapacity and dishonesty? In the light of every development the Democracy, now in complete power, can make, they sink away in respectful and admiring silence. No rascals, no dishonesty, no incapacity, no idleness, no robbery, no enormous surplus of \$400,000,000 howled from every stump in the country, and the great count of

General Grant's Book.

The canvassers for General Grant's book have already reported one hundred thousand bona-fide subscriptions, and in addition to these, fifty thousand are proposed. Of these subscriptions Ohio takes eighteen thousand, while the remainder are scattered broadcast throughout the country. It is said by those who have read portions of the chief as almost universally a good word tor Los and now and then a section-house, no one but yourself to rely upon, and every step a stab, that's a different breed of one but yourself to rely upon, and every step a stab, that's a different breed of one but yourself to rely upon, and every step a stab, that's a different breed of one but yourself to rely upon, and every step a stab, that's a different breed of one but yourself to rely upon, and every step a stab, that's a different breed of one but yourself to rely upon, and every step a stab, that's a different breed of pups. Russia and England.

THE BEAR MAKES A FIERCE ONSLAUGHT To the Editor of the Times-SIB Your correspondents, "A. J." and Wm. Pearce, in your issue of the 5th inst., have had their say on this interesting subject. In their eyes Russia is the embodiment of tyrrany; England the supreme benefactor of mankind. Being confessedly Englishmen themselves they naturally look at things through British spectacles, and are unable to comprehend how others can see things differently Now Russia has by no means a popular government. It makes no pretension in that direction. It is an acknowledged despotism. England, on the other without bail. hand, affects to have a nominal monarchy and a real republic, and to be ests of its "subjects." What are the How can she justify the claim What has followed her rule in the countries she has conquered? Simply this: Immense wealth to the "privi-leged classes" of England, poverty, ines and starvation to the masses of the conquered. English conquests have been pushed solely with a view to extend the commerce of England and to open up new markets for her manufactured goods. England is small in area, but an improvement of the commerce of mense workshop, densely populated, obliged to import millions of dollars worth of breadstuffs annually to sustain life, and she must have foreign markets, or else her people must emi-

crowded portion of the globe. The rights of her "conquered subjects" have never been considered; the interests of Hence, in dealing land, India and her first aim has always been to destroy their industrial enterprises and reduce the natives to a serfdom infinitely more degrading than any that has ever existed in Russia or the United States. Her system of "landlordism" is the s employed to accomplish this With a Bible in one hand and a sword in the other, she pounces upon the defenseless, seizes their land and divides it amongst a few of her 'generals' or camp-followers, giving to each an immense area. The latter thereupon assume that the confiscated ionable furnishing goods and hats. land is theirs; the natives are then obliged to work for the robber at what- Electro-magnetism the New Mean ever he chooses to pay them. There is she utterly ignores in her dealings with the weak, and she is primed and loaded with hypocrisy in justifying her vil-lainies before civilized nations. Poverty unutterable, wretchedness and miser alleged giory consists in the fact that thieves" and "manufacturing lords," royal paupers and pensioners riot in luxury and idleness on the proceeds of the labor of who sweat and toil and starve. England is responsible for more woe to mankind than any other

rate of interest, thus making them truly independent. The result is 40,000,000 interest in the soil upon which they can make a living. The English idea would be forty landlords and 39,999,960 slaves solely dependent upon the forty.

Why is it that England in her present extremity dare not arm the native Interest in the soil upon which they work on short notice.

Worthless Imitations

Bewere of worthless imitations, and always ask for the best: Henley's Celery Beef and dians? Simply because she knows that she has robbed them mercilessly, and that once armed her victims would naturally seek revenge and turn such weapons on their arch-enemy, England. Why is it that the recently conquered Asiatic tribes are loyal to Russia? Sim-ply because Russia treats them as equals, throws open to them all the honors of the Empire, and she does not steal their

umanitarian standpoints she is the

and as England always does.

Regarding the attitude of England like Americans to believe that England sympathized with the North. Americans will never believe anything of the kind. Americans know that England wanted the South to succeed; they know that the Confederacy made a bid for English support by inserting a clause in their constitution which would clause in their constitution which would forever prevent the imposition of protective duties on manufactured goods. This meant that in the event of success America was to be a gigantic farm, worked by slaves and ruled by slave and England was to be the workshop to supply all their needs. This was sufficient to induce ever-sel-fish John Bull to buy Confederate onds, fit out privateers, sneer at the called "Federal States" and aid the ause of slavery in every possible manalways, in his pocket, and he would have some more actively to the aid of the sause of slavery if the Russian Bear had not ordered the British lion to "halt." e latter animal—always a bully in ding with the weak, but ever cowdly when confronted with an equalgized for his crimes when the war was over and purchased peace with \$15,-000,000. Russia was the friend of the 00.000. Russia was the friend of the nited States, England their enemy, ad Americans never will forget it. he "ruling classes" of England to-day espise our government and would go ito ecstacies over its downfall to-morow just as much as in 1861. The England to "privileged classes by privilaged classes by privileged classes by privileged classes for privileged classes by privileged classes for privileged classes," with tere contempt for and disregard of the ights of the useful and producing militants. It is in brief a system of robbery under the guise of representative government with the system of robbery and the guise of representative government. and Americans never will forget it. HOT BREAD MADE WHOLESOME

The Royal Baking Powder possesses a peculiar merit that is not possessed by any other leavening agent. It provides bread, biscuit, cake, muffins, or rolls which may be eaten when hot without inconvenience by persons of the most delicate digestive organs. With most persons it is necessary that bread raised with yeast should lose its freshness or become stale before it can be eaten with safety. The same distressing results follow from eating biscuit, cake, pastry, etc., raised by the cheap, inferior baking powders that contain lime, alum, or other adulterants. The hot roll and muffin, and the delicious hot griddle cakes, raised by Royal Baking Powder, are as wholesome and digestible as warm soup, meat, or any other food.

Another greatly superior quality possessed by the Royal Baking Powder is that by which the preservation of important elements of the flour is effected in raising the bread by the mechanical operation of the gas without fermentation. Yeast, and all baking powders that produce the leavening gas by fermentation, as is well known, destroy a portion of the nutritive elements of the flour, and particularly those which are the most healthful and the greatest aids to a perfect assimilation of the food. The Royal Baking Powder, while perfectly leavening, retains without change or impairment all those elements which were intended by nature, when combined in our bread, to make it literally the

THE MAYOR'S COURTBOOM,
34x40 feet, 18-foot ceiling, with three tool adoor leading to the front balcony, whence the city Solons may harangue gathered multitudes. This apartment, like the others, has a fire-grate, and a four-foot panel wainscoting of grained redwood. A door opens from it eastwardly into the Mayor's private office, a front room 9x18 feet, with two large windows, water and closet. This in turn opens eastwardly into the COUNCIL CHAMBER, a pleasant but rather small room 25x40 feet, lighted by three 10-foot front windows and a large central skylight. There is some talk among the Councilment of giving this room to the Mayor's new warrivals at the St. Elmo: E. L. Padock, San Francisco; E. W. Smith, Illinois; F. W. Prindle, H. M. Peyser, Chas. P.
